DECLARATION OF CONFORMITY for following product(s)

.....

.....

.....

.....

.....

.....

As manufacturer of the above-mentioned product/s
we declare that:

The **product or homogenic parts of the product and the packaging** do not contain

- **PVC and fragrances.**
- Substances which are identified as **SVHC** (substances of very high concern) and included in the list foreseen in Article 59 of Regulation (EC) No 1907/2006, present in concentrations higher than 0.1%. This is valid for the actual list of SVHC according to the date of this declaration.

Are chemical mixtures used as constituents of the products or chemical surface treatment agents?

Chemical mixtures as constituents of the products are e.g. Inks, ink and gels for writing and drawing implements, liquid, pasty, powdered and solid colors, refills of colored pencils, wax crayons, chalks, stamping media, adhesives (in containers or on adhesive tapes) and correcting agents.

yes **no**

If yes, we declare

- There are no substances included which are listed in **table at annex 1: Restricted hazard classifications** in concentrations higher than the limit values.
- No **volatile organic compounds VOC** (incl. aromatic compounds) are included (definition of VOC according to the Industrial Emissions Directive 2010/75/EU)
 - o Aromatic hydrocarbons as preservatives
 - o Denaturing agents of alcohol
 - o Solvents of organic pigments
 - o AND

CAS-no.	name	
64-17-5	ethanol	sum < 10 w/w%
71-23-8	propanol	
67-63-0	isopropanol	
107-98-2	1-methoxypropanol-2	< 5 w/w%
57-55-6	propylenglykol; propan-1,2-diol	< 0,3 w/w%
	Other VOC	< 0,3 w/w%

- **No azo dyes are included** that can cleave certain cancer-causing amines and other carcinogenic or potentially sensitizing dyes (see Appendix 2)

Are preservatives included?

(in chemical mixtures used as constituents of the products or chemical surface treatment agents)

yes no

If yes, we declare

- Biocides are used exclusively for in-can preservation, ie for extending their shelf life against microbial damage
- Following preservatives are included:

CAS-no.	name	concentration

The following substance restrictions and prohibitions are observed:

- **For the following products for children (toys):**

Stains (watercolors, school tempera paints, finger paints, poster colors, acrylics, linoleum inks, inks), felt-tip pens and wax crayons:

Preservatives and concentration limits according to ÖNORM EN 71-7 (finger paints)

- **For other writing, drawing and painting equipment and accessories:**

Only substances (active substances or biocides) for which a substance dossier was submitted for evaluation as a preservative (product type 6) within the framework of the Biocidal Product Regulation (EU No. 528/2012) are allowed. If, after evaluation, the inclusion of an active substance in the Union list of approved active substances for product type 6 is refused, the use of these substances is no longer permitted.

- **In the other mixtures - as constituents of the products or chemical surface treatment agents - the following preservatives are used:**

They are

- Approved for cosmetics or food

And/or

- The content of preservatives from in-can preservation or from preserved raw material does not exceed the following values:
 - CIT (CAS 26172-55-4) 15 ppm
 - MIT (CAS 2682-20-4) 15 ppm
 - CIT / MIT (CAS 55965-84-9) 15 ppm
 - BIT (CAS 2634-33-5) 200 ppm
 - Na pyrithione (CAS 3811-73-2) 200 ppm
 - Bronopol (CAS 52-51-7) 200 ppm
 - 3-iodo-2-propynyl-butylcarbamate (IPBC, CAS 55406-53-6) 80 ppm
 - Free formaldehyde (CAS 50-00-0) 10 ppm

In total, a maximum of 500 ppm of the latter preservatives may be included. The values are to be calculated according to the information given in the safety data sheets and the formulation.

Are plastics part of the product to over 5%?

Yes

No

If yes, we declare

Following substances have not been added (above 0,01% in product):

- **Halogenated Organic Compounds** (for example as solvent or flame retardant)
- **Phthalates and Organophosphates** (see annex 3)
- **Heavy Metals / Heavy Metal Compounds**
Including cadmium, lead, chromium (VI), mercury, arsenic, barium (other than barium sulfate), cobalt, antimony, selenium.
- For **products for children**, the polycyclic aromatic hydrocarbons (PAH) content does not exceed the concentration limits specified for the actual version of the GS (Certified Safety) mark designation.
- The labelling of plastics with a mass fraction $\geq 50g$ is in accordance with ÖNORM EN ISO 11469 and ÖNORM EN ISO 1043-1.

If the use plastic recyclate or bio-based plastic is mandatory and has to be declared, the following criteria are met:

- **Recycled Plastics** meets the requirements of EN ISO 14021 for "Pre-" or "Post-consumer material".
- The term **bio-based plastic** means that the plastic was made, at least in part, from biomass (eg starch, sugar, cellulose).

Is wood part of the product to over 5%?

Yes

No

If yes, we declare

- All processed wood comes **from legal sources**.
- **At least 70% of the wood** comes from sustainable forestry.

Are metals part of the product to over 5%?

Yes

No

If yes, we declare

It is used exclusively **iron, steel, magnesium or aluminum**.

When using aluminum, at least 30% by weight of secondary aluminum is contained.

The surfaces of inserted metals are **polished, sandblasted, powder coated, brushed or sanded**.

Any **electroplating** (copper plating is not permitted!) is subject to the requirements of the current BAT (Best Available Techniques).

Nickel-plated surfaces are only used in those parts that do not come into direct and prolonged contact with the skin.

Is paper/cartboard part of the product to over 5%?

Yes

No

If yes, we declare

The raw material used is **100% recovered paper** (tolerance 5%).

At least 60% of the recovered paper used comes from "lower and middle grades" (according to the European recovered paper and standard variety list ÖNORM EN 643 and the European List of Standard Grades of Recovered Board).

Annex 1: Restricted hazard classifications and limit values

CLP Regulation – Hazard Statements	Limit mass % *
Acute Toxicity Cat. 1,2, or 3	
H300, H310, H330 H370	0.1
H301, H311, H331	0.1
Specific Target Organ Toxicity	
H370, H371, H372, H373	1.0
Carcinogenicity	
Cat. 1A, 1B: H350, H350i	0.1
Cat.2 H351	0.1
Germ cell mutagenicity	
Cat. 1A, 1B: H340	0.1
Cat.2: H341	1.0
Reproductive toxicity	
Cat. 1A, 1B: H360F, H360D, H360FD, H360Fd, H360Df	0.1
Cat.2: H361f, H361d, H361fd	0.1
Toxic for reproduction on or via lactation: H362	0.1
Respiratory/skin	
H334 and/or H317 Cat. 1 und 1B	0.1
H334 and/or H317 Cat. 1A	0.01
Environmental hazards	
Acute aquatic hazard Cat. 1: H400	1.0
Chronic aquatic hazard Cat. 1: H410	1.0
Chronic aquatic hazard Cat. 2: H411	1.0
Hazardous to the ozone layer: H420	0.1
Substances which, according to Article 59 of the REACH Regulation, have been placed on what is known as the candidate list. The version of the list of candidates up to date at the time of application shall apply. See: https://echa.europa.eu/candidate-list-table	0.1
Substances meeting the criteria for PBT (persistent, bioaccumulative and toxic) or vPvB (very persistent and very bioaccumulative) (REACH, Annex XIII)	0.1
Substances which, according to the (Austrian) Ordinance on Occupational Exposure Limits ('Grenzwertverordnung') [6], are clearly identified as carcinogenic agents (Annex III – A1 and A2) and classified as carcinogenic substance groups or compounds (Annex III – C).	0.1
Substances which, according to the (Austrian) Ordinance on Occupational Exposure Limits ('Grenzwertverordnung') are classified as reasonably suspected of having carcinogenic potential (Annex III –B).	1.0

* These limits are „general limits. If there are specific concentration limits established these limits are valid.

For ready-to-use ballpoint pen pastes, the following hazard categories or H-phrases are excluded from this quantity restriction:

CLP Regulation – Hazard Statements
Specific Target Organ Toxicity
H371, H373
Skin
H317 Cat. 1 und 1B
H317 Cat. 1A
Environmental hazards
H400 Acute aquatic hazard Cat. 1
H410 Chronic aquatic hazard Cat. 1
H411 Chronic aquatic hazard Cat. 2

Annex 2

Azo dyes, which potentially separate one of the aromatic amines listed below (according to REACH regulation 1907/2006):

4-aminobiphenyl	(92-67-1),
benzidine	(92-87-5),
4-chloro-o-toluidine	(95-69-2),
2-naphthylamine	(91-59-8),
o-aminoazotoluene	(97-56-3),
2-amino-4-nitrotoluene	(99-55-8),
p-chloroaniline	(106-47-8),
2,4-diaminoanisole	(615-05-4),
4,4'-diaminodiphenylmethane	(101-77-9),
3,3'-dichlorobenzidine	(91-94-1),
3,3'-dimethoxybenzidine	(119-90-4),
3,3'-dimethylbenzidine	(119-93-7),
3,3'-dimethyl-4,4'-diaminodiphenylmethane	(838-88-0),
p-cresidine	(120-71-8),
4,4'-methylene-bis-(2-chloroaniline)	(101-14-4),
4,4'-oxydianiline	(101-80-4),
4,4'-thiodianiline	(139-65-1),
o-toluidine	(95-53-4),
2,4-diaminotoluene	(95-80-7),
2,4,5-trimethylaniline	(137-17-7),
4-aminoazobenzene	(60-09-3),
o-anisidine	(90-04-0).

Carcinogenic, teratogenic or reprotoxic and potentially sensitising dyes (according to table 2B in EN 71-9):

Disperse Blue 1	(2475-45-8)
Disperse Blue 3	(2475-46-9)
Disperse Blue 106	(12223-01-7)
Disperse Blue 124	(61951-51-7)
Disperse Yellow 3	(2832-40-8)
Disperse Orange 3	(730-40-5)
Disperse Orange 37/76	(12223-33-5, 13301-61-6)
Disperse Red 1	(2872-52-8)
Solvent Yellow 1	(60-09-3)
Solvent Yellow 2	(60-11-7)
Solvent Yellow 3	(97-56-3)
Basic Red 9	(569-61-9)
Basic Violet 1	(8004-87-3)
Basic Violet 3	(548-62-9)
Acid Red 26	(3761-53-3)
Acid Violet 49	(1694-09-3)

Annex 3**Phthalates**

Name	CAS-Nummer
Di-methyl phthalate (DMP)	131-11-3
Di-ethyl phthalate (DEP)	84-66-2
Di-n-propyl phthalate (DPP)	131-16-8
Di-ethyl-hexyl phthalate (DEHP)	117-81-7
Di-butyl phthalate (DBP)	84-74-2
Di-iso-butyl phthalate (DIBP)	84-69-5
Di-n-pentyl phthalate (DnPP)	131-18-0
Di-iso pentyl phthalate (DIPP)	605-50-5
n-Pentyl-isopentyl phthalate	776297-69-9
Di-n-hexyl phthalate (DHP)	84-75-3
Di-iso-hexyl phthalate	71850-09-4
Di-cyclo-hexyl phthalate (DCHP)	84-61-7
Di-n-octyl phthalate (DNOP)	117-84-0
Di-iso-octyl phthalate (DIOP)	27554-26-3
Di-nonyl phthalate (DNP)	84-76-4
Di-iso-nonyl phthalate (DINP)	28553-12-0, 68515-49-1
Di-iso-decyl phthalate (DIDP)	26761-40-0, 68515-49-1
Butyl benzyl phthalate (BBP)	85-68-7
Bis- 2-methoxy-ethyl phthalate (DMEP)	117-82-8
Bis(2-propylheptyl) phthalate (DPHP)	53306-54-0

1,2-benzenedicarboxylic acid, di-C7-11-branched and linearalkyl esters (DHNUF)	68515-42-4
1,2-benzenedicarboxylic acid, di-C6-8-branched alkyl esters, C7-rich (DIHP)	71888-89-6

Organophosphates

Stoff	CAS-Nr.	Threshold
TCEP	115-96-8	Detection Limit
T CPP	13674-84-5	Detection Limit
TDCP	13674-87-8	Detection Limit
Triphenylphosphate	115-86-6	Detection Limit
Tri-o-kresylphosphate	78-30-8	Detection Limit
Tri-m-kresylphosphate	563-04-2	Detection Limit
Tri-p-kresylphosphate	78-32-0	Detection Limit
